## COMPANY INFORMATION

---

Company name

Company address

Contact name

Telephone number

E-mail

Website

Affiliated or parent organization(s)

Company type

Current biodiesel producer

Future biodiesel producer

Design, engineering and/or  
construction of biodiesel plants

## BIODIESEL PRODUCTION (CURRENT OR FUTURE PRODUCER)

---

Are you currently producing biodiesel?

If so, what is the current annual  
capacity?

What is the required future plant  
capacity using the ROTOCARV reactor  
technology?

Is the biodiesel production process to  
be batch, semi-batch, or continuous?

If the production process is batch, please indicate the size of the batch

What is the plant schedule (# hours/day, # days/week, # weeks/year)?

What feedstocks are you using?

Are there other feedstocks you would like to use? If so, please list

What is the water concentration of those feedstocks?

What are the total acidity numbers of those feedstocks (please indicate as mg of NaOH (100% pure)/g of oil, or mg of KOH (100% pure)/ g of oil, or % oleic acid)?

What are the densities of those feedstocks?

Are you considering increasing production in the future? If so, to what desired capacity?

Are you considering modifying your plant from batch to continuous?

In what Countries are you producing or considering producing?

How many biodiesel production plants do you operate or plan to operate?

What are your primary objectives in selecting a reactor system?

What is the timetable for your reactor system selection decision?

Other comments

## **BIODIESEL PLANTS (FOR DESIGN, ENGINEERING AND/OR CONSTRUCTION OF BIODIESEL PLANTS)**

---

Are you currently offering biodiesel production plants?

How many plants have you designed, engineered and/or constructed?

Where are the plants located or to be located?

What are the annual capacities of the plants?

Are the plants batch, semi-batch, or continuous?

Do you provide "turn-key" biodiesel plants? Process guarantees?

Did you develop the technology in-house or license from another entity?

What is the capacity range of plants you offer or plan to offer?

What feedstock(s) are used or to be used in your plants?

What is the water concentration of those feedstocks?

What are the total acidity numbers of those feedstocks (please indicate as mg of NaOH (100% pure)/g of oil, or mg of KOH (100% pure)/ g of oil, or % oleic acid)?

What are the densities of those feedstocks?

What are your primary objectives in selecting a reactor system?

What is the timetable for your reactor system selection decision?
